Inclusive Teaching: Reaching More Students Post-Covid

Even when we care deeply about equity and inclusion, we may not be reaching as many students as we think. Diverse students bring different assumptions about you, your material, themselves and our world. Taking the time to consider inclusion issues (yes, even in STEM fields) can make you a better teacher for everyone. All good teaching is inclusive teaching, and there are some relatively easy and practical things you can do that will especially change the experience of under-represented students in your classes.
