

Academic Component Criteria for Periodic Performance Review and Promotion & Tenure

Component Name: *History and Government*

Periodic Performance Review (PPR) and Promotion & Tenure Reviews assess faculty performance and productivity in compliance with standards using criteria established by the university and each Academic Component (AC). In some cases, program-level criteria may also be developed. The additional criteria established by an AC (or program, if appropriate) will:

- include examples of performance appropriate to the discipline,
- be consistent with university criteria, and
- be at least as stringent as university standards.

AC or program criteria must be developed by regular, full-time faculty in the AC. The criteria must be reviewed and approved by the (1) AC administrator, (2) college dean, (3) Faculty Evaluation and Development Committee, (4) University Promotion and Tenure Committee, and (5) Provost/VPAA.

Development Academic Component Criteria

For many of the criteria listed, it is appropriate for AC criteria to demonstrate a progression of rigor regarding the expected outputs or outcomes as a faculty member progresses in rank (e.g. from Assistant Professor to Associate Professor, etc.). This concept of progression is sometimes expressed as follows for various ranks:

<u>Assistant Professor</u>	<u>Associate Professor</u>	<u>Professor</u>
Perform	Role model	Mentor others
Participate & contribute	Contribute effectively	Lead and/or make significant contribution
Establish & build	Actively engage	Lead and/or make significant contribution
Academic component service	College service	University service
Committee membership	Committee leadership	National or regional committee participation or leadership

<u>Assistant Professor</u>	<u>Associate Professor</u>	<u>Professor</u>
Local or state committees or presentations	Regional or national committees or presentations	National/International committees or presentations

Development of Teaching Criteria

The teaching role of university faculty is to promote the academic and professional growth of students. Teaching requires knowledge of the subject, ability to present information and materials clearly, and an ability to help motivate students to learn. The purpose of the review process for teaching is to recognize accomplishments and/or areas of deficiency and to aid the faculty member in professional development in the area of teaching.

While all faculty members may not have the opportunity to participate in each of the following, teaching effectiveness generally refers to the competence of the instructor in:

- classrooms (online, hybrid, or face-to-face),
- laboratories,
- studios,
- clinics,
- supervision of independent studies and/or internships,
- supervision of projects, research and fieldwork,
- guidance of student scholarly outputs (e.g., professional papers, artistic projects,
- capstone projects, thesis, and dissertation), and
- student mentoring.

The review of teaching effectiveness may include a discussion of factors such as evaluation of teaching methodology, course development, course materials, course management, classroom management, student achievement of learning outcomes, and content expertise. University and AC criteria will be the primary means of evaluating teaching. To provide a comprehensive set of inputs, each review of teaching at a minimum must include all four types of input:

- Faculty self-reflection and evaluation, including appropriate supporting evidence
- Student course evaluation feedback
- Observation and feedback from other faculty
- Observation and feedback from the AC administrator.

Faculty completing reviews in Years 1-5 must include input collected during the year under review. Faculty reviews after Year 6 of employment include observations from other faculty and the AC administrator collected at least once during the three-year period under review in addition to the required self-reflection/evaluation and student course evaluation feedback for the three-year period. Whenever possible, the input from any of the four sources listed above should include both quantitative and qualitative feedback. Faculty, however, are not required to include qualitative feedback from student course evaluations; but, should a faculty member choose to include any excerpt of the qualitative course evaluation report, the faculty member must include all of the qualitative course evaluation data for the review period to assure context for the selected excerpts.

Development of Scholarship Criteria

“The scholarship role of the University is to expand the domain of human knowledge, imagination, and forms of expression; contribute to improvements in professional practice; and enhance teaching effectiveness. Scholarly pursuits include not only the diverse attributes that comprise inquiry, but also the forms of public statements of results that comprise inquiry, such as publications, performance, or presentation”(excerpt from *The Research Mission of the University*, Fall 1990).

Boyer’s (1990) teacher-scholar model underpins TWU’s faculty advancement standards. The components of the model are scholarship of discovery of new knowledge, scholarship of integration, scholarship of application, and scholarship of teaching. Sound scholarship may be individual or collaborative, within one discipline or interdisciplinary. The emphasis in evaluation is quality and impact rather than quantity. Scholarly outputs consist of original intellectual/creative/artistic expressions that enhance the knowledge of society. To expand public knowledge, a scholarly output must find public expression, such as peer-reviewed publications and presentations, performances, or juried exhibitions.

University and AC criteria for the domain of scholarship are appropriate for the University’s overall scholarship goals and consistent with the standards of the specific discipline. AC criteria will emphasize quality and impact and reflect disciplinary standards for the quantity and type of scholarly output. As appropriate for each discipline, criteria will also recognize the role of grants. Evaluation of scholarship will include feedback from external reviewers, as required for tenure and/or promotion.

Development of Service Criteria

For the purpose of faculty performance review, service is the engagement of faculty related to their academic disciplines or expertise, which produces a benefit to another party. In a broad sense, institutional service is using a faculty's knowledge and skills to benefit the institution, professional organizations, and the community through active involvement and leadership. Professional service encompasses active participation in an organization by providing leadership or facilitating the goals of the organization. Therefore, appropriate documentation of service will emphasize both the activity undertaken and the benefit produced to the other party. Faculty members at all levels are expected to engage in meaningful service.

Service is generally grouped into two categories: internal and external to the University. Internal service is an extension of the commitment to shared governance, and the opportunity and responsibility of faculty members to participate in such governance (See Policy 5.02, *Faculty Responsibilities*, for a description of participation and leadership in the decision-making processes of the University.). External service is frequently grouped into one of two categories: service to the profession or service to the community. Although faculty members should not be discouraged from providing service in any field in which they have an interest, faculty service activities are evaluated as part of performance review when faculty members use their professional expertise to serve their academic, professional, and civic communities. External service is expected to be provided with little or no additional compensation to the faculty member rendering the service.

University and AC criteria for the domain of service must be appropriate for the University's overall mission and vision and related to the characteristics of the specific discipline. University and AC criteria should emphasize quality and impact of service rather than quantity. Evaluation of external service may include feedback from external reviewers, as required for tenure and/or promotion.

Criteria for Tenure

In considering the award of tenure, Texas Woman's University seeks to recognize professional achievement in the areas of teaching, scholarship, and service. Each case is evaluated on its own merits in relation to the criteria and in the context of the needs and plans of the AC and the University. Faculty evaluation is the exercise of professional judgment at multiple levels regarding the quality of faculty work that is shaped by objective data. When making a recommendation for tenure, an AC affirms that the candidate meets the criteria for Associate Professor or Professor, as applicable, and has demonstrated the potential for sustained contributions. A recommendation to confer tenure must be supported by strong evidence of the high quality and distinctiveness of a candidate's work and degree of influence on the field. When tenure is awarded, the continuation of high-quality performance is expected. Exceptions to these criteria, while possible, will be rare. Tenure is never granted automatically to any candidate who enters or completes the probationary period.

Table 2: Standards for Tenure-track Faculty Appointments and Promotions

The following minimum standards for appointment or promotion to each academic rank are meant to provide equity and comparability across the university. Achievements of the candidate must be documented, and promotion evaluation must include external peer evaluations. Faculty being appointed or promoted are expected to continue to meet the criteria for each of the previous rank(s) as well as the rank currently held. Faculty members applying for promotion and/or tenure must also satisfy the applicable Academic Component criteria.

<p><u>Assistant Professor</u> Appointment Criteria:</p>	<p><u>Associate Professor</u> Appointment Criteria:</p>	<p><u>Professor</u> Appointment Criteria:</p>
<ul style="list-style-type: none"> • Completion of appropriate terminal degree or equivalent as defined by academic unit; <i>PhD in History; PhD in Government/Political Science or advanced degree in related field</i> • Demonstrate current capability and desire for excellence in teaching, scholarship, and service as well as potential for significant accomplishment in these areas; <i>Graduate educational preparation in the teaching role;</i> <i>Demonstrates the potential to be an effective teacher and student advisor;</i> <i>Evidence of outcomes might include:</i> <ul style="list-style-type: none"> • <i>Student course evaluations</i> • <i>Peer review evaluations</i> 	<ul style="list-style-type: none"> • Normally will have served for a minimum of 6 years at rank of Assistant Professor at college or university level and have served full time at least 2 years at TWU at the rank of Assistant Professor; • Demonstrated significant contributions in teaching, advising, or other instructional activities; scholarship, research and/or other creative activities; and university, professional, and community service; 	<ul style="list-style-type: none"> • Highest academic rank awarded only in cases of clear and sustained records of exceptional quality. Rank is in recognition of attainment rather than length of service; • Normally will have completed 6 years as Associate Professor at college or university level and served full time at least 4 years at TWU at the rank of Associate Professor; • Demonstrated continuous and sustained meritorious achievements beyond the level of Associate Professor commensurate with assignments in areas of teaching, advising, or other instructional activities; scholarly research and/or other creative activities; and professional, university, and community service;

Table 3: Standards for Clinical Faculty Appointments and Promotions

TWU supports numerous professional programs that prepare students to become clinicians at the doctoral, master’s, and baccalaureate levels. This level of professional preparation requires that some faculty be excellent clinicians and educators with a significant responsibility to both roles. The clinical designation may be used for faculty who are primarily engaged in clinical education, clinical practice, and/or supervision of clinical students. Scholarship and service commensurate with appointment rank are expected. Development of an independent research program is not essential; however, scholarship activities are expected to contribute to course content and relevancy, pedagogy, addressing professional issues, or program development including evidence-based practice.

The following definitions of clinical ranks represent the minimum university standards for appointment and promotion and are meant to provide equity and comparability across the university. Achievements of the candidate must be documented. Faculty being appointed or promoted are expected to continue to meet the criteria for each of the previous rank(s) as well as the rank currently held. Faculty members applying for promotion must also satisfy the applicable component requirements.

<p><u>Clinical Instructor</u></p> <p>Appointment Criteria:</p>	<p><u>Assistant Clinical Professor</u></p> <p>Appointment/Promotion Criteria:</p>	<p><u>Associate Clinical Professor</u></p> <p>Appointment/Promotion Criteria:</p>	<p><u>Clinical Professor</u></p> <p>Appointment/Promotion Criteria:</p>

** Clinical practice may substitute for teaching experience for persons appointed as clinical faculty at the discretion of the dean.

Table 4: Standards for Lecturer Appointments and Promotions

The instructional function of the university requires lecturers who can effectively communicate the content of the current body of knowledge and latest research results in the classroom and other learning environments. In addition, some lecturer faculty may participate in undergraduate and graduate projects, and may serve as content experts on master’s and doctoral committees. Lecturers are not eligible for tenure.

Since teaching is an essential part of a lecturer faculty appointment, effectiveness in teaching is an essential criterion for appointment or promotion. Lecturers must demonstrate command of their subject matter, continuous growth in content area, continuous development in instructional delivery systems and approaches, ability to organize and convey material in a way that fosters learning, and ability to interact with students effectively. Development of an independent research program is not essential; however, scholarship activities are expected to contribute to course content and relevancy, pedagogy, addressing professional issues, or program development. The following definitions of lecturer rank represent the minimum standards for promotion and are meant to provide equity and comparability across the university. Achievements of the candidate must be documented. Faculty being appointed or promoted are expected to continue to meet the criteria for each of the previous rank(s) as well as the rank currently held. Faculty members applying for promotion must also satisfy the applicable AC requirements.
