Commented [ME17]: Click above the table you want to reference (you will need to do this for each table)  
1. Click the Reference tab  
2. In the Captions group, click Insert Caption  
3. Make sure the Label drop down indicates Table  
4. Select OK  

Once you have done that to all the tables you can create the list. To do this follow the below directions:  
1. Place your curser on your list of tables page  
2. Click the Reference tab  
3. In the Captions group, click Insert Table of Figures  
4. Make sure the Caption label drop down has Table selected  
5. Uncheck the Use hyperlinks instead of page numbers box  
6. Select OK

CHAPTER I

INTRODUCTION

Heading Level One

One of the most commonly occurring mistakes when setting up heading levels is that students tend to begin their heading level count from the chapter title and not after it.

Heading Level Two

Information in a level two heading should be a subcomponent of the level one heading. Chapters should never begin with a level two heading.

Heading level three. According to the APA manual, regardless of how many headings are in a section, all headings start with the highest-level heading.

Heading level four. Level four should be indented, have only the first word capitalized, end in a period, be boldfaced and in italics, and start the paragraph.

Heading level five. Indented, no bold, italicized, ends with a period, only the first word is capitalized.

[Note: Chapter titles vary on department standards; update the chapter titles and headings as necessary.]

REFERENCES

Commented [ME23]: All references need a hanging indentation. To achieve this, select all your references, select the drop down arrow in the Paragraph box on the home screen, under indentation → special, select hanging.

These references are in APA format, for more information for APA and other formats please see the Appendices.

Double check reference format for your specific style (MLA, AMA, APA, Chicago, etc.)

AMA Heading Template/References

Commented [ME24]: To get wording in the center of the page: select the text that you want to center, on the Layout tab, click to Dialog Box launcher in the Page Setup group, then click the Layout tab, in the Vertical alignment box, click Center.

Insert a continuous break after wording so that you can have the next page start at the top of the page, not the center.
