Institutional Review Board (IRB)

It is the policy of Texas Woman’s University (TWU) that all research conducted by any TWU faculty member, staff member, or student using human subjects must have prior approval from a TWU Institutional Review Board (IRB) before the research is initiated.

The purpose of the IRB is to protect the rights and welfare of research subjects and to ensure that such research is conducted in full compliance with both the letter and the spirit of applicable regulations.

The TWU IRB operates under the following governances: Federalwide Project Assurance # FWA00000178, TWU University Policy 1.15 Human Subjects in Research, and TWU IRB Procedures – December 2014.
IRB Review

Only RESEARCH involving HUMAN SUBJECTS must be reviewed by the IRB.

- *Research* is a systematic investigation designed to test hypotheses, evaluate programs, draw conclusions, or contribute to generalizable knowledge.

- *Human subjects* in research are living individuals about whom investigators (professionals or students) conducting research obtain (1) data through intervention or interaction with individuals, or (2) identifiable private information.
Check out our Website!

Find Information on the following:

- Basic IRB Process
- IRB Procedures & Policy
- Full Review Meeting Dates
- Cayuse & Submitting New Applications
- Request Forms for Legacy Studies
- Consent Form Guidelines and Samples
- Human Subjects Training Requirements
- Workshop and Training Sessions

All TWU research personnel MUST have a Cayuse account. Email irb@twu.edu to have an account created for yourself and for all other research team members.

Once you have an account set up, go to: https://twu.cayuse424.com/ and login using your TWU Portal/Password.
Logging into Cayuse

Cayuse Research Suite

Research Administration Modules
- Cayuse 424
- Cayuse IRB (Human Studies Compliance)

Cayuse Dashboard
Creating a New Study

Click Here.

[Image of Cayuse IRB dashboard with highlighted 'New Study' button]
Adding a Title

Enter your title here.

Click on the check mark when you are satisfied with your title.
Editing your Title

Hover your cursor to the side of your title, and click on the pencil to edit. Once you are finished editing, click on the check mark to save.
Creating a New Submission

Click here, then click on "Initial."
Starting your Application

Click on any of these to start your application.

- Edit
- PDF
- Delete
- Assign PI
- Assign PC
- Complete Submission
Application Form

The red * means you must answer the question. You cannot submit until it is answered.

Each section will be marked with a green check mark once it is complete. You cannot submit until each section has a green check mark beside it.
Completing Your Submission

Once you see green check marks on each section, the “Complete Submission” button will appear at the bottom.

*Please note that you should only click on this button only after all Co-PIs, and the faculty advisor has looked over the application. Once you click on this, your application be ‘locked’ to editing.
Confirm & Certify

Once you click on “Complete Submission,” you will have to confirm the routing of your submission.

Then, you must Certify your submission.
Confirm one last time. Each PI, Co-PI, and Department Chair/Dean must also certify and confirm.
Cayuse Help

Remember, you can always call the IRB office at 940-898-3378 or email irb@twu.edu and someone (Sandy) can help you with Cayuse issues.

For detailed instructions on how to start and submit a new study, here is a Guide to Creating and Submitting a New Study in Cayuse.
IRB Process
What happens after you submit an application...

- **Certification Required email** – All PIs, Co-PIs, and Faculty Advisors will receive an email notification once an application has been submitted. After all of the above have certified, the department chair/dean will receive an email as the Organizational Approver to certify as well.

- **Receipt notification email** – Your application has been received by the IRB office. The IRB Analyst will pre-review (check that all necessary items are included) and will route your submission for review.

- **More Information Requested (if necessary)** – You will receive an email notifying you that we need more information before we can approve it. Comments will be in your application; not in the letter. You will make revisions to your application and resubmit. All PIs, Co-PIs, and Faculty advisors must re-certify.

- **Exemption Notification (if appropriate)** – the study involved little-to-no risks and we don’t need additional information, so you’re good to move forward

- **Approval Letter (when appropriate)** – you provided all of the information we need and/or revised the application packet so that everything fits within the regulations so you’re ready to move forward
Informed Consent

Why is informed consent so important?

- Informed consent is the process of telling potential research participants about the key elements of a research study and what their participation will involve. The informed consent process is one of the central components of the ethical conduct of research with human subjects. [https://twu.edu/institutional-review-board-irb/informed-consent-guidance/](https://twu.edu/institutional-review-board-irb/informed-consent-guidance/)

When are you required to obtain written informed consent?

This Guide to Writing a Consent Form provides the minimum standards for preparation of the written consent form.

New consent form requirements went into effect on January 21, 2019. Most notable requirements are:

- Key Information Summary
- Identifiable Private Information in future research

Sample Consent Form – Dallas
Sample Consent Form – Denton
Sample Consent Form – Houston
Appropriate Processes for Obtaining Consent

The process for obtaining consent is much more than just having the participant sign a consent form. You must provide sufficient details about how/when/where you will obtain consent.

- **How** – Will you do this face-to-face? Will you mail or email consent forms to potential participants? Will participants be allowed appropriate time to read and make their decision? How will they get the forms back to you? How will they contact you with questions? How will they receive a copy of their consent form?

- **When** – Will they need to decide right then and there? Can they take the consent form home to read over and decide later? Will they have access to the consent form prior to the initial meeting time, and if so, is that when they sign the consent form?

- **Where** – Will consent be obtained online? Will you have participants sign the consent form in person at the site of the initial meeting? Will they scan and email their signed consent forms? Will they return consent forms to a school official?
Consent vs. Assent

CONSENT

- Obtained from adult participants
- In the state of Texas, the legal age of consent is 18. You may need to check the laws in other states or countries.
- If the participants are minors, consent must be obtained from a parent or legal guardian of the minor.

ASSENT

- Obtained from minors
- Adequate provisions must be made for attaining the assent of minors when the minors are capable of providing assent
- As with consent, it is good practice to obtain written assent.
