

Fall Research Series

Sept. 28

Blagg-Huey Library: Room 308

Dallas Center: IHSD 8201

Houston Campus: IHSB 6305

10:30 - 11:30am

**Using InCites to analyze institutional productivity:
Benchmarking performance & identifying collaborations**

Attendees will learn how InCites provides data to research organizations to analyze institutional productivity, benchmark Texas Woman's University against peers worldwide, and identify internal and external partnerships and collaborations.

The library may offer access to InCites soon. This presentation explains what tools and services are available via InCites. We welcome your thoughts and recommendations regarding this database.

1:00 - 2:00pm

**Determining the best place to publish your research:
Training for early researchers and graduate students**

Using Web of Science, attendees will learn how to:

- Increase the odds of having your manuscript accepted by understanding the publication landscape and finding a good fit
- Use a literature database (Web of Science) to discover publication trends
- Use citation metrics to provide quantitative data to supplement subjective understanding of a discipline

2:30 - 3:30pm

**Planning your promotion and tenure portfolio:
How to identify citations to your work**

Using Web of Science, attendees will learn how to:

- Gather and analyze citations to your journal articles
- Find authors who publish often
- Find authors producing the most citation impact
- Learn which authors have cited your work
